

Edit Customer Form

```
<div ng-app="MyApp" ng-controller="MyController">

    <table border="0" cellpadding="0" cellspacing="0">
        <tbody ng-repeat="m in Customers">

            <input type="hidden" ng-model="CustomerId" value="{{ m.CustomerId }}" />
            <tr>
                <td style="width: 150px">
                    Name<br />
                    <input type="text" ng-model="Name" value="{{ m.Name }}" />
                </td>
                <td style="width: 150px">
                    Country:<br />
                    <input type="text" ng-model="Country" value="{{ m.Country }}" />
                </td>
                <td style="width: 200px">
                    <br />
                    <input type="button" value="Update" ng-click="UpdateData()" />
                </td>
            </tr>
        </tbody>
    </table>
</div>
